12 Volt Victorian Lamppost (Green)

Miniature Scale Models LLP

12 Volt Victorian Lamppost (Black)

Miniature Scale Models LLP

Prototype

The model is not based upon any specific prototype but takes different features from a number of lampposts that have been seen at various railways and heritage sites. The lamppost would compliment a wide range of models including railways, dioramas and tramways.

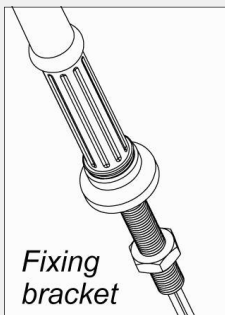

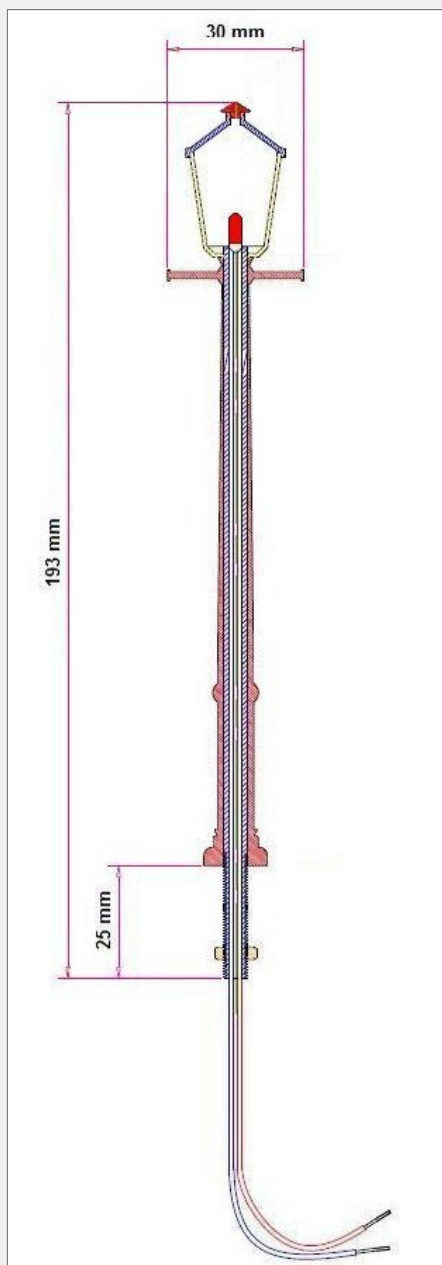

Scale

Designed for those modelling to a scale of 16mm to the foot (ie 1:19). However, in reality lampposts come in a variety of sizes depending upon the surroundings in which they were used. The model stands 168mm high (not including the fixing bracket) making it suitable for 1:12, 1:14, 1:16 and 1:24 (depending upon the setting).

Finish

The lamppost comes ready made and is available in either green or black.

The overall height is 193mm, including the discreet fixing bracket. The fixing bracket is an extension of the brass rod which runs through the centre of the main post. The brass rod adds strength to the model and allows the 12 Volt grain of wheat light bulb to be fed up into the glazed area.

Made in China.
